Maximum 10 points for this performance measure

- Evidence that all the 4 quarterly reports have been discussed and used to make recommendations (in each quarter) for corrective actions during the previous FY: score 4

There was evidence that all quarterly DHT support supervision reports were discussed to make recommendations.

For example:

During support supervision for quarter 1 (report dated 5 October 2017), the supervising team found out that health most health facilities did not have child health cards used in immunization. Instructed in charges to keep a log of staff and the DHT recommended the delivery of the cards to health facilities. The assistant DHO delivered the cards within one week of the recommendation, before the next support supervision as evidenced by the delivery book at DHOs office.

According to the supervision report for quarter 2 dated 16th January 2018, the supervising team identified lack of postnatal corner at Apoi HC II which was put in place by the team as evidenced by the activity report pictures.

During quarter 3, there were cases of indiscipline at Apoi HC and the DHT recommended an emergency meeting to bridge the gap. The meeting was held at Apoi HC and some staff were transferred to hospital for further mentor-ship.

During quarter 4, the supervising team established that some in charges were chronically absent from their duty stations, the DHT recommended summoning the in-charges at DHO's office to show cause why they would not be disciplined. The supervision report was dated 19th April 2018 and on 20th April 2018, the assistant DHO for maternal and child health wrote a letter to the in charges summoning them to appear before DHT.

Therefore, all quarterly reports had been discussed by DHT had recommendations were made hence a score of 4
